

AUTHENTICATOR

enterpriseair

*Put the Power of your
Access Control System
in the palm of your hand*

Authenticator is the industry leading handheld solution that ensures fast and accurate accounting of employees and visitors - anytime anywhere. Simply scan badges with our rugged hand-held device and instantly verify employee photo, access level, time in/out, muster location, and more.

Use Authenticator to:

- **Secure Vehicle/Pedestrian Gates**
- **Set Temporary Checkpoints**
- **Account for Employees/Visitors During Emergencies**
- **Manage Offsite Events**
- **Perform Random Cardholder Spot Checks**

Works With Any Access Control System

Existing integrations to most major access control systems. Additional systems can be supported with our easy to use database synchronization tools.

Reads All Standard Badge Types

Authenticator has the capability to read Prox, Smart Cards, iClass, MiFARE/DESFire, 1D/2D Barcodes, and Mag Stripe credentials and also supports fingerprint authentication and decoding a wide range of standard ID's such as military IDs and driver's licenses.

Operates With or Without a Wireless Network

Authenticator's intelligent synchronization mechanism gives you true mobility. You have full feature functionality no matter where you are - online or off.

Rugged for Industrial Use

Authenticator is IP65 Rated and Certified and is ready to work under the tough conditions of your environment.

Can be Easily Configured for Your Needs

Virtually any information from your access control system can be displayed on Authenticator's screen. Now you can have the information you need - anywhere you need it.
